Abstract (en)  
[origin: WO2014127854A1] The invention relates to an underwater lighting unit (1), in particular for assembling into a wall recess of a swimming pool, in particular for a safety system for monitoring the underwater region of a swimming pool, comprising a housing (2), the interior (3) of which is bordered by at least one transparent front panel (4), wherein at least one light emitter (5) is arranged in the interior (3). In order to advantageously develop the underwater lighting unit, at least one camera (8) is arranged in the interior (3) of the housing (2). The invention further relates to a safety system for monitoring the underwater region in a swimming pool.
