Abstract (en)

[origin: WO2014127999A1] The invention relates to a contact carrier (100) comprising an electrical contact (128) and a contact arm (136) which is connected to the electrical contact (128) in an electrically conducting manner. The contact arm (136) comprises a tolerance-compensating portion (138) and a contact base (132) formed on the tolerance-compensating portion (138) for electrically contacting the electrical contact (128) with a contact surface.
