Abstract (en)

[origin: WO2014128117A1] The present invention relates to a method of configuration, a display monitor and a picture-taking system. The method of configuring a display monitor for picture-taking system consists in particular: in generating ((a) - (f); (h), (i)) at least one display monitor configuration file defining characteristics of display of work tools as a function of predetermined criteria (a); in executing on command from the user said configuration file so as to display at least one of the work tools selected and characterized by the configuration file on the display screen (19) of said display monitor (2).
