Abstract (en)
[origin: WO2014127844A1] A method is described for selecting television programs and their related services and for displaying them on or through a television receiver apparatus (1), said method comprising the steps of selecting, through a control device (10), a certain available television program and its related television service associated to a certain service identifier; verifying, through a central processor (5) and a tuning and demodulating unit (2), if said a certain television program selected by an user and its related television service, is broadcast with a different service identifier, with respect to the television service selected as a consequence of the program chosen by the user; controlling, through said central processor (5) and a video circuit (4) which television service, among those found services that transmit said certain television program selected by the user, has the best video quality available; displaying on a screen (7) said certain television program selected by the user, and its related television service, having said best video quality.
