Abstract (en)

[origin: EP2961006A1] The present invention relates to an electrical connector assembly comprising a plug connector. The plug connector comprises a plug connector housing and a secondary locking device. The secondary locking device is arranged on the outside of the plug connector housing and is movable between an open and a closed position. A pitch formed between the plug connector housing and the secondary locking device in the open position is covered from at least two opposite sides of the assembly.
