Abstract (en)

[origin: WO2014063185A1] The present invention provides removable liner for a container, said liner suitable for working viscous material such as wet or moist compositions and the like, said liner comprising: a) a deformable resilient body nestable within a container; b) a stick resistant surface which resists adhesion of the material being worked and; c) means for positive engagement with the container such that when the material is worked in the liner, the liner is secured in position.
