Abstract (en)

[origin: WO2014131956A1] The invention relates to a windshield in which at least the inner portion consists of a transparent plastic wall (11), characterised in that one (11a) of the edges of said wall (11) comprises a portion (12) that is integrally moulded with said wall (11), said portion having means that enable the attachment by snap-fitting of a functional part that is separate from the windshield.
