Abstract (en)
[origin: WO2014131615A1] The invention relates to a concrete screw having a shaft (31) and a screw thread (33) arranged on the shaft and a threaded coil (13) and a threaded base (14). According to the invention, in the end area (41) of the shaft, inside the shaft, at least one cut-out recess (36) for widening a borehole is provided, said recess extending, at least in sections, inside the thread base without interrupting the threaded coil. The invention also relates to a flat die for producing said type of concrete screw. The invention further relates to a method for producing a concrete screw.
