Abstract (en)  
[origin: WO2014131418A1] A warning device (1) for warning against conditions favourable for the growth of mould and fungus on a moist permeable surface. The device (1) comprising a housing (2) of a gas impervious material with at least a first compartment, in which the electronic components of the warning device (1) and the power source for the components are located. The warning device (1) comprises sealing means (4) adapted to engage said moist permeable surface in order to provide a closed cavity within said housing (2) of gas impervious material.
