Abstract (en)

[origin: EP2962841A1] The present invention relates to a handle sealing machine (100) for attaching more than two handles on a bag at once, comprising a main unit (110) where handles are attached to a bag, and a supply unit (102) to supply strips (16) in order to form plurality of handles. The machine and method of the present invention enables to form plurality of handles (104, 105) at least some of which are longer than the other whereby said handles are sealed to a mouth portion of a bag.
