Abstract (en)

[origin: US2016001638A1] An air vent assembly, for example, for a motor vehicle, having an air vent, which has at least one air guide louver with a trailing edge and a leading edge, whereby the air guide louver with its leading edge is mounted pivotable about a rotation axis associated with the trailing edge, and having a decorative device. It is provided that the decorative device has at least one stationary decorative louver with a visible edge extending in the extension of the trailing edge, and that the air guide louver is mounted on the decorative louver pivotable about the rotation axis.
