Abstract (en)

A smart and compact electrical lock system (1) comprising a PCB card having a microprocessor, a memory and a real time clock circuit, a lock having a latch and an electrical or electromagnetic driving means for driving said latch, and a reader (2) for association with a digital access card having a memory, such that, in use, said reader (2) reads data on the memory of said access card and grants access based on validity of said data; and said reader (2) is in electric connection with said driving means for actuating it, wherein said lock system (1) further comprises an input panel (3) for entering a user input, and an indicator panel (4) in electrical connection with said input panel (3) for indicating said user input; said lock system further comprises an alphanumeric and/or graphical display (5); and said lock, input panel (3) and indicator panel (4) are combined in a single integrated structure.
