Abstract (en)

[origin: WO2014135636A1] The invention relates to an article of clothing (1) made of a textile material, comprising at least two electrodes (2, 4) arranged on the article of clothing (1), said electrodes being arranged on the article of clothing (1) so as to contact at least one surface region of a person wearing the article of clothing (1) when the article of clothing (1) is worn. Electric line connections (8) are arranged in the article of clothing (1) in order to supply electric energy to the electrodes (2, 4). The article of clothing (1) has a control device which is provided in order to actuate the electrodes (2, 4) using an alternating voltage.
