Abstract (en)

[origin: WO2014135941A1] The invention relates to a foundation for a clothing of a carding machine which is constructed of a plurality of layers, wherein at least one cover layer made of caoutchouc and at least five woven-fabric layers made of cotton woven fabric are provided. Between each pair of woven-fabric layers made of cotton woven fabric, at least one intermediate layer connecting the woven-fabric layers is provided. The intermediate layer or a top layer opposite the cover layer is made of a conductive rubber.
