Abstract (en)
[origin: WO2014135389A1] The invention relates to a refrigeration appliance (100) comprising a refrigeration compartment (104), in which a drawer (106) is mounted such that it can be displaced between an inserted position (I) and a pulled-out position. According to the invention, the drawer (106) can be arranged such that it can be pulled out and/or inserted in a first position (A) and in a second position in the refrigeration compartment (104), the first position (A) and the second position differing along the direction (Y) of the width of the refrigeration appliance (100).
