Abstract (en)

[origin: WO2014135770A1] A method for managing data relative to motor vehicles with a view to the subsequent graphic generation of electrical diagrams of electrical systems. The method for managing data relative to motor vehicles with a view to the subsequent graphic generation of electrical diagrams of electrical systems, makes it possible to generate (E3) a set of elements by a computer, each element of the set comprising an electrical system from a list of electrical systems, and an associated vehicle configuration from a list of configurations, and each element determining, preferably potentially, an electrical diagram to be generated. (Figure 1)
