Abstract (en)

[origin: EP2965652A1] A double-layered screen cap (100) of a cosmetics container (200) includes a lower cap (10) and an upper cap (20) pivotally connected together by a connecting unit (30). The lower cap (10) is bored with a plurality of insert holes (14), and the upper cap (20) is provided with a plurality of projections (21) corresponding to the insert holes (14). Thus, when the upper cap (20) is covered on the lower cap (10), the projections (21) of the upper cap (20) will be respectively and correspondingly inserted in the insert holes (14) of the lower cap (10) to hermetically seal the insert holes (14) for restrictedly positioning the cosmetic material (300) in the cosmetics container (200), able to prevent the cosmetic material (300) from leaking out of the cosmetics container (200).
