Abstract (en)

[origin: CN205063543U] The utility model relates to a control handle (1) for window and/or door (100) with handle (10), not handle axial fixity ground and rotationally installing in backstop board (20) or on it, wherein handle (10) have concave part (11) distolateral polygon spare (12) is controld to axial fixity and anti being fixed with with rotating in the concave part, the control handle has bush (40), and the bush supports in inside on backstop board (20), and bush (40) have break -over opening (41) that are used for handling polygon spare (12) and power cooperation ground and/or shape cooperation ground are connected with fixed component (60), fix component (60) and have fixed opening (61), and manipulation polygon spare (12) passes fixed opening stretches out and will control polygon spare (12) and fix on axial direction (L) in the fixed opening, wherein bush (40) and fixed component (60) axial fixity ground and anti rotation ground are connected via hem (80) each other.
