Abstract (en)

An imaging device includes an imaging unit that is provided at a case body and images an object; an operation input unit utilized to input an imaging operation; a first instruction unit that instructs the imaging unit to execute the imaging when the imaging operation is input; a second instruction unit that instructs, based on a trigger other than the imaging operation, the imaging unit to execute the imaging; and a control unit that performs, based on a state of the case body, a control to invalidate any one of the instruction by the first instruction unit and the instruction by the second instruction unit.
