Abstract (en)
[origin: WO2014139711A1] The invention relates to an inner shoe (1), in particular for a ski, snowboard, inline skating shoe, climbing boots or the like, having a foam base material (3), on which in the inner area (23) of the inner shoe (1), an inner lining (21) is applied, at least in some areas. The inner shoe (1) is characterized in that the inner lining (21) of the inner shoe (1) is at least partially made of leather or of a material having similar or identical physical properties (leather inner lining).
