Abstract (en)  
[origin: WO2014143124A1] A four-in-one passive mattress management system and method is disclosed for facilitating various tasks associated with beds of all sizes including making beds; rotating mattresses; holding a bed skirt in place while a mattress is rotated; installing or removing and re-installing a mattress, for example, in order to replace a bed skirt. Both single cover and two cover embodiments In addition, embodiments are disclosed in which the cover in accordance with the present invention is embedded in the underside of the mattress or the foundation. The invention is suitable for conventional beds on box springs or beds that are supported by fixed or variable platforms.
