Abstract (en)

[origin: WO2014142860A1] A carton for containing at least one article. The carton comprises a plurality of panels at least partially forming an interior of the carton. The plurality of panels comprises a first panel and a second panel, the first panel and the second panel being in face-to-face contact to at least partially form the interior of the carton. The first panel comprises at least one article protection flap for protecting the at least one article. The at least one article protection flap is foldably connected to the first panel and moveable between a first position that is substantially parallel to the first panel and a second position wherein the article protection flap is folded relative to the first panel. The second panel comprises at least one access feature for positioning the at least one article protection flap from the first position to the second position.
