Abstract (en)

[origin: WO2014139641A1] The invention relates to a method for filling cans or the like containers (2) with liquid contents in a filling phase of a filling process. The container interior of the respective container (2) arranged on the filling element (7, 7a) in a sealed position, in at least one purge phase that temporally precedes the filling phase, is purged with a purge gas in the form of an inert gas that is centrically introduced into the container interior and by draining off from the container interior the purge gas that flows through the container interior at a purge gas pressure.
