Abstract (en)  
[origin: WO2014145245A2] The present invention provides methods and compositions comprising a chimeric norovirus capsid protein comprising a norovirus VP1 major capsid protein backbone comprising a norovirus epitope and/or motif selected from the group consisting of: a) Epitope A; b) Epitope B; c) Epitope C; d) Epitope D; e) Epitope E; f) NERK motif; and g) any combination of (a) through (f) above, wherein the norovirus epitope and/or motif is from a norovirus strain that is different from the norovirus VP1 major capsid protein backbone.
