Abstract (en)

[origin: WO2014145669A2] Exemplary embodiments of methods and systems for providing multimedia are provided. A method for providing multimedia can include receiving one or more data files containing multimedia from a first user, storing the one or more data files containing the multimedia, and providing at least one of the one or more data files based on access granted by the first user and at a future time set by the first user. A trustee service can be provided to provide the one or more data files to a user at a future time based on predetermined criteria, such as a data, condition or future event.
