Abstract (en)

[origin: WO2014139712A1] The invention relates to a heating installation (10) and to a method for operating such a heating installation (10), having at least one force/heat coupling installation, having at least one additional heater (14) and having at least one heat-storage unit. It is proposed that the heat-storage unit be configured in the form of a heat buffer (16).
