Abstract (en)

[origin: WO2014145719A2] An improved shotshell of the type having a hull, a head at the proximal end, propellant disposed in the hull, a wad disposed in the hull distal to the propellant, and a load disposed in the hull distal to the wad. The improvement comprises the load including a plurality of individual shot, at least a portion of which are at least partially surrounded by a friable polymeric that breaks up upon the firing of the shell to release to the shot.
