Abstract (en)

[origin: WO2014160500A2] Techniques associated with a social data-aware wearable display system are described, including a wearable device having a frame configured to be worn, a display coupled to the frame, the display located within a field of vision, a sensor configured to capture sensor data, and a communication facility configured to send the sensor data to another device and to receive social data to be presented on the display, the system also having an application configured to process the sensor data and to generate the social data using the sensor data.
