Abstract (en)  
[origin: WO2014140315A1] A method comprising: providing a first image on a label printer user interface, wherein said first image is representative of at least one of at least one label to be printed and at least one object to which a label is to be applied; and providing a second image on said user interface associated with said first image, said second image representative of a dimension of said first image; enabling a user to modify a dimension of said second image; wherein as said dimension of said second image is modified, said dimension of said first image is correspondingly updated.
