Abstract (en)

[origin: US2014282833A1] Systems, methods and machine-readable media for providing a security service are disclosed. The methods include receiving a modification of the application object code to allow the software application to transmit a request for the security service; retrieving the modified application object code corresponding to the software application from memory; receiving, via a processor, the request for the security service from the modified application object code; and providing, via the processor, the security service. The systems and machine-readable media performing operations according to the methods disclosed.
