Abstract (en)
[origin: US2016015111A1] The invention relates to a helmet that includes an outer shell and a cap, the cap being comprised of a material such as EPS or EPP and arranged inside the shell. The shell has an upper portion designed to cover at least the crown portion of the skull, the cap further comprising a first layer having a thickness covering substantially the upper portion and a plurality of pads of height projecting from the first layer towards the head, the first layer and the pads forming a single piece, and the height of the pads being greater than the thickness of the first layer.
