Abstract (en)

[origin: EP2975206A1] In a reinforced profile (20) for sash frames, surrounding the filling of the sash frame and comprising an external wall (21) with an oblique wall (121), a pane-surrounding wall (22), a middle wall (23) with a recess (27) for fitting and passing into a seal-mounted wall (123), and an under-pane wall (122), an internal wall (24) with an under-strip surface (124), and a lower wall (25) that surround an interior of the profile (20) with a main chamber (29) and with additional chambers (26, 136) in which a reinforcing section (70) or profile is located, the main chamber (29) in the vicinity of a lower region of the internal wall (24) has an additional space (129) located below a level of a front surface (127) of the middle wall (23), and surrounded by the seal-mounted wall (123) and a vertical wall (128) and a horizontal wall (28) of lower internal additional chambers (26), and the reinforcing section (70) or profile has an extension (75) of its internal arm, which is located in the additional space (129). The extension (75) of the internal arm of the reinforcing section (70) placed in the additional space (129) below the level of front surface (127) of the middle wall (23) is smaller than 12% of the whole height of the profile.
