Abstract (en)
[origin: WO2014146731A1] The present invention relates to a vacuum cleaner nozzle (10) comprising a suction plate (1) having an inlet side (11) and an outlet side (12), said vacuum cleaner nozzle comprising an air duct (30) having a duct wall, wherein said air duct extends through the suction plate (1) from a suction opening (13) on the inlet side (11) to the outlet side (12). The nozzle (10) further comprises a front brush (15) adapted to engage with a surface to be cleaned and for at least partly sealing said suction opening (13) against said surface being cleaned, said front brush (15) extending at least partly along said inlet side and said front brush being arranged in a front brush holder (16). Furthermore, the nozzle (10) comprises a rear brush (17) adapted to engage with a surface to be cleaned and for at least partly sealing said suction opening (13) against said surface being cleaned, said rear brush (17) extending at least partly along said outlet side (12). The rear brush (17) is arranged in a rear brush holder (18), and said front brush holder (16) and said rear brush holder (18) are separate pieces.
