Abstract (en)
[origin: CA2903321A1] The invention relates to a starting device for a slide and to a method for starting a sliding process in a slide way, in particular a water slide, having a starting ramp (16), which comprises a slide section (17) having a slide surface (18), which has a loading zone (28) for at least one user, which extends from an entry-side end (23) of the slide section (17) to a blocking device (35) arranged in the slide section (17), the blocking device (35) blocking the slide surface (18) when in a starting position (48), and having a pivoting device (30), by means of which the starting ramp (16) can be moved from a loading position (29) to a starting position (41), and having a control device (35), which actuates the pivoting movement of the starting ramp (16) between the loading position (39) and the starting position (41) and the blocking device (35) between the starting position (38) and a release position (50).
