Abstract (en)

[origin: WO2014146787A2] The invention relates to a roofing element (U), wherein the roofing element (U) comprises a frame (6) and a shield (3). Here, two longitudinal frame sections (LRA1, LRA2) each comprise a support (1) and a U-profile (2), wherein the support (1) forms, in side view, a first arch segment (9) and wherein the U-profile (2) forms, in side view, a second arch segment (9), wherein the shield (3) is held in mutually opposite grooves of the two U-profiles (2) and wherein each U-profile (2) is stabilized by the associated support (1).
