Abstract (en)

[origin: WO2014146746A1] An adjustable guide (10) to attach to the floor for hanging sliding doors, made from any suitable material, comprises a rectangular base (12) with slotted holes (14) for attachment means to the floor, on said base (12) a through aperture (16) is formed delimited in part by an integral moulded structure (18) extending vertically with a substantially U-shaped cross- section on its side, defining opposite faces (19-19') and, on a side facing one of said holes (14), an access mouth (18') to a cavity (21) in which a wedge-shaped element (26) is pushed which expands said faces (19-19') progressively outwards.
