Abstract (en)  
[origin: WO2014147335A1] A housing (10) is proposed for an ammonia-sensitive component (9) in a selective catalytic reduction pollution-control system. This housing comprises, on the one hand, a wall (17) and, on the other hand, a trap (12) configured in order to capture gaseous ammonia emanating from the wall or which, if it were not trapped, would emanate from the wall.
