Abstract (en)
[origin: WO2014146761A1] The invention relates to a metering pump (1), in particular for liquid detergent in a washing machine, a dishwasher or similar, said pump comprising a pump designed as a piston pump with a reciprocating piston (7), and comprising an electric motor (6) that has an output shaft (8). An eccentric (9) which interacts with the reciprocating piston (7) is arranged on the output shaft (8) in such a way that the rotational motion of the electric motor (6) is converted into a translatory reciprocating motion of the reciprocating piston (7).
