Abstract (en)  
[origin: WO2014183961A1] The invention relates to a positioning method and device. According to the invention, a measurement method is used when there is a fairly large distance between a vehicle and a charging station, said measuring method determining the distance by way of absolute propagation time measurement. In a proximity zone between the charging station and the vehicle a relative propagation time measurement between a plurality of received signals is carried out.
