Abstract (en)
[origin: WO2014146960A1] The invention relates to a plug connector having a housing (1), wherein the housing (1) has a lower housing part (2) and a cover (3) for closing the lower housing part (2), wherein the cover (3) is pivotably arranged on the lower housing part (2) by means of a fastening device (4), wherein the fastening device (4) comprises an accommodating element (5) fastened to the lower housing part (2), a retaining element (6), which is fastened to the cover (3) and has a bearing region (32) by means of which the retaining element (6) is rotatably arranged on the accommodating element (5), and a spring element (7), which is accommodated in the accommodating element (5) and extends to the bearing region (32) of the retaining element (6), wherein at least one locking cam (26a, 26b) is formed for fastening the accommodating element (5) on the lower housing part (2), which at least one locking cam engages in an opening (18a, 18b), and wherein at least one fastening element (8) in the form of a screw or rivet is fed through the spring element (7) and the accommodating element (5) and is fastened to the lower housing part (2).
