Abstract (en)
This invention relates to a wool textile fabric for automotive seat cover which presents itself as a driving technical option for the automotive subsector. Its aim is to meet new and demanding end consumer expectations, allowing for additional applications and/or emerging nano and micro techniques and technology. The invention is an integrated product that in one technological solution that will meet a vast array of considerations: thermophysio-logical comfort, sensorial, ergonomic, psychological, aesthetics, cleanability, odour neutralisation, antibacterial properties and UV protection whilst complying with the technical requirements demanded by the automotive industry. Consumers changing ideals on sustainability, social responsibility and environmental concerns were also taken into the highest of consideration.
