Abstract (en)
[origin: WO2014154903A1] The invention relates to a stroller for a child, which is convertible into a bicycle trailer and includes a chassis (1), onto which a handlebar is hingedly mounted such as to be tiltable (B1) between a "stroller" position, in which the handlebar (11) allows said stroller to be guided and moved, and a "trailer" position, in which the handlebar (11) can be secured to a bicycle (62). According to the invention, the stroller includes means for stowing one or more front wheels (31), controlled by tilting said handlebar (11) such that: in said "stroller" position, said front wheel(s) (31) are in an operational position making contact with the ground; and in said "trailer" position, said front wheel(s) (31) are in a stowed position and do not interact with the ground.
