Abstract (en)
[origin: WO2014154736A1] The invention relates to a packaging device (2) and a packaging method for highly compressed bales (3) on a baling press (1). The packaging device (2) has a supply device (9) for a web-shaped packaging material (8) and a wrapping device (10) for attaching an annularly surrounding wrapping web (7) on the free side surfaces (32) of the compressed bale (3) which is held between compression rams (31). The wrapping device (10) is arranged with a transport means (20) movably relative to the compressed bale (3), wherein the supply device (9) is arranged in a spatially and kinematically separate manner from the wrapping device (10), in particular in a stationary manner.
