Abstract (en)

[origin: WO2014154350A1] The invention relates to a media line, in particular for transporting a urea-water solution (1), comprising a hose line (2) for media transport, a heating device for heating the medium (1), at least one connector (3) mounted at one hose line end for liquid-tight connection of the hose line (2) to an assembly, and a preferably electrical connector heating device (4) for heating the connector (3). According to the invention the connector heating device (4) comprises an elastically deformable clamping component (5), which is pushed in the elastically deformed state onto the connector (3) and is fixed on the connector (3) by the clamping action of the connector (3).
