Abstract (en)

[origin: WO2014155000A1] The invention relates to a method for transmitting a controlled-access multimedia content to at least one recipient terminal. The method comprises a step of inserting into a file containing the multimedia content at least one identifier relating to the recipient terminal or to the user of the recipient terminal, the identifier being intended to control access to the multimedia content by the recipient terminal, and a step of dispatching the file to at least the recipient terminal. The invention also relates to a corresponding transmission device.
