Abstract (en)

[origin: WO2014154976A1] The invention relates to a method of supervising an operation of making available, via a telecommunication network, to at least one user, termed the consuler (UC), of at least one subset of a set of information available on a user, termed the publisher (UP). The method comprises the following steps: obtaining of at least one rule, termed the sharing rule, each said sharing rule being associated with at least one said subset of information and defined by at least one criterion to be verified in order to authorize a making available to a consuler user of the associated subset of information, said at least one criterion specifying at least one place of publication where the publisher user (UP) must be situated and/or at least one place of consultation where a consuler user (UC) must be situated; obtaining (E3P) of a location (Pp) of the publisher user (UP) and/or of a location (Pc) of the consuler user (UC); identification on the basis of the location or locations obtained of at least one information subset for which all the criteria of at least one associated sharing rule are satisfied, making available (E5) via a terminal of at least one consuler user of at least one identified subset of information.
