Abstract (en)  
[origin: WO2014154693A1] A sheet handling apparatus having a sheet input section (22), a sheet processing section (24), a sheet output section (26), a conveying mechanism (36) adapted convey sheets (12,14) from the input section (22) through the processing section (24) to the output section (26), and a controller (40) for the conveying mechanism (36), wherein the controller (40) is adapted to be switched between a feed through mode, in which the sheets (12, 14) are output by being fed through from the processing section (22) to the output section (26), and a rewind mode, in which the sheets are output by being fed in reverse direction from the processing section (24) back to the input section (22).
