Abstract (en)  
[origin: WO2016016417A1] Supply strip (1) for supplying current phases (L1, L2, L3) of a low-voltage network into a busbar system or for tapping off current phases (L1, L2, L3) from the busbar system, having an elongate main body (2) which can be transversely mounted on a plurality of busbars arranged in a parallel manner and contains contact rails (5-1, 5-2, 5-3) which, in the mounted state of the supply strip (1), make contact with the busbars for the purpose of supplying or tapping off the current phases (L1, L2, L3) carried on the busbars, wherein the contact rails (5-1, 5-2, 5-3) are each directly connected to associated connecting rails (11-1, 11-2, 11-3) which have a connection for electrical connection to the low-voltage network on an end face of the elongate main body (2).
