Abstract (en)

[origin: WO2014162297A1] A metallic frame (10) for chairs with tubular elements (11), comprising two inverted V-shaped elements (12) that form the legs of a chair, which are parallel and joined substantially at their inside curvature (14) to a rodlike crossmember (15), two L-shaped elements (13) connected by the crossmember (15) on which they are arranged in a parallel configuration so as to form a support for the back and for the seat, respectively with their first portions (16), which are substantially vertical, and second portions (17), which are substantially horizontal.
