Abstract (en)

[origin: WO2014161623A2] The invention relates to a pulling element for automatically pulling out a closing element of a filter of a filter escape device and to a filter escape device comprising a hood and a filter integrated into said hood and having at least one such pulling element. The invention also relates to a system of filter escape devices comprising said filter escape device and to a device shell and method for mounting a system of filter escape devices.
